AI TACKLES BIOLOGY
HOW MACHINE LEARNING WILL REVOLUTIONIZE SCIENCE AND MEDICINE

BUILDING BRAINS WITH SILICON

ALGORITHMS FOR CANCER

DATA DIVING IN BIOLOGICAL IMAGES

PLUS
ARTIFICIALLY INTELLIGENT DRUG DEVELOPMENT
Contents

THE SCIENTIST | THE-SCIENTIST.COM | VOLUME 33 NUMBER 05

Features

22 Run Program: Cancer
Using input from images to -omes, artificial intelligence can find patterns in tumors and generate prognoses where human clinicians see only a jumble of data.
BY AMBER DANCE

28 A Silicon Brain
Biology-inspired computer chips may help scientists better simulate neurological function.
BY SANDEEP RAVINDRAN

36 A Deeper Look
With the help of computer programs that learn from experience, researchers look for meaning in vast volumes of image data.
BY JEF AKST AND CAROLYN WILKE

ON THE COVER: © ANDRIY ONUFRIYENKO, GETTY IMAGES
Department Contents

10 FROM THE EDITOR
Cerebral Inception
Our brains have evolved to the point where we can build artificial brains that might help us understand our brains. Let that sink in.
BY BOB GRANT

12 THE BASICS
Artificial Intelligence: An Introduction
A brief history of AI, machine learning, artificial neural networks, and deep learning
BY JEF AKST

13 NOTEBOOK
Going Through the Motions; Listening for Your Health; A Better Beehive; Into the Cell

20 MODUS OPERANDI
Microbiology Meets Machine Learning
Artificially intelligent software augments the study of host-pathogen interactions.
BY RUTH WILLIAMS

21 CRITIC AT LARGE
AI Versus Animal Testing
Machine learning could be the key to reducing the use of animals in experiments.
BY THOMAS HARTUNG

46 THE LITERATURE
AI for filtering out sequence noise; algorithms predict CRISPR repairs

48 PROFILE
Bob Murphy: Autopilot Advocate
BY SHAWNA WILLIAMS

51 SCIENTIST TO WATCH
Nick Turk-Browne: Pattern Seeker
BY CATHERINE OFFORD

52 LAB TOOLS
Automating the Fight Against Superbugs
Antibiotic resistance is on the rise. Can AI help?
BY AMBER DANCE

56 BIO BUSINESS
Computing a Cure
The pharmaceutical industry is looking to machine learning to overcome complex challenges in drug development.
BY BIANCA NOGGRADY

60 READING FRAMES
Robots and Eureka Moments
Artificial intelligence can be trained to recognize patterns and predict results. But will machine learning ever be able to make novel scientific discoveries?
BY KARTIK HOSANAGAR

64 FOUNDATIONS
Learning Machine, 1951
BY JEF AKST

THIS MONTH AT THE-SCIENTIST.COM:

VIDEO
Murphy on AI for Biology
See Robert Murphy of Carnegie Mellon University discuss the revolutionary application of machine learning to biomedical research.

VIDEO
A Window on Memory
Watch Princeton University’s Nicholas Turk-Browne describe his research on how the human brain makes, stores, and adjusts memories.

SLIDESHOW
AI Photo Album
Peruse some images that artificial intelligence is sifting through for clues about the biology they depict.

AS ALWAYS, FIND BREAKING NEWS EVERY DAY ON OUR WEBSITE.

Coming in June

HERE’S WHAT YOU’LL FIND IN NEXT MONTH’S ISSUE

• The new frontier of quantum biology
• How the body tolerates disease instead of fighting it
• Can microbiome-produced antigens lead to autoimmunity?
• Inclusivity in academia

AND MUCH MORE
