ON TARGET
RESEARCHERS STRIVE TO MAKE INDIVIDUALIZED MEDICINE A REALITY

PERSONALIZED CANCER VACCINES

N OF 1 TRIALS

HOW MICROBES AFFECT DRUG RESPONSES

PLUS GliOBLASTOMA ON A CHIP
Features

24 Looking After Number One
N-of-1 trials have struggled to take off in clinical care and research, but a growing focus on individualized medicine could give them new life.
BY CATHERINE OFFORD

30 One Size Fits One
By predicting unique antigens produced by each patient's cancer, researchers pursue individualized vaccines.
BY JASREET HUNDAL AND ELAINE R. MARDIS

38 This Is Your Microbiome on Drugs
The body's commensal bacteria influence whether medications will be effective, and at what dose.
BY SHAWNA WILLIAMS
Department Contents

10 FROM THE EDITOR
Monogrammed Medicine
Words matter. How we talk about the coming revolution in clinical care is no exception.
BY BOB GRANT

14 NOTEBOOK
In the Weeds; Smart Pills; 3-D Treatment; High and Dry

21 MODUS OPERANDI
Digital DNA Detection
A CRISPR-based electronic sensor flags target DNA sequences at high speed.
BY RUTH WILLIAMS

46 THE LITERATURE
Printing cancer on a chip; individualizing CAR T cell therapy; biomarkers for pain

48 PROFILE
In the Blood
Stuart Orkin has unraveled the molecular underpinnings of inherited blood disorders, and his work forms the basis for several therapies now in development.
BY ANNA AZVOLINSKY

51 SCIENTIST TO WATCH
Laura Bowers: Cancer Disruptor
BY SHAWNNA WILLIAMS

53 LAB TOOLS
Sneaking Past the Sentinels
Researchers using viral vectors to deliver gene-containing therapies are developing strategies to outwit the immune system.
BY MONIQUE BROUILLETTE

57 BIO BUSINESS
Beta Boom
Biotech startups are integrating advances in stem cell science with novel transplantation technologies to develop new treatments for diabetes.
BY ERIC BENDER

61 READING FRAMES
Man and Machine Medicine
The artificial intelligence revolution has the potential to bring us closer to individualized medicine.
BY ERIC TOPOL

64 FOUNDATIONS
Heel Prick, 1957
BY ASHLEY YEAGER

Online Contents

THIS MONTH AT THE-SCIENTIST.COM:

VIDEO
Mardis on the Future of Clinical Genomics
Meet researcher Elaine Mardis of the Institute for Genomic Medicine at Nationwide Children's Hospital in Ohio and coauthor of a feature article on cancer vaccines.

VIDEO
Topol on Deep Medicine
Reading Frames author Eric Topol, founder and director of Scripps Research Translational Institute and Reading Frames author, discusses the future of the doctor-patient bond in an era of artificial intelligence-driven medicine.

VIDEO
Orkin on Childhood Cancer
This month's Profilee, Dana-Farber Cancer Institute researcher Stuart Orkin, talks about treating kids with cancer and other blood disorders.

AS ALWAYS, FIND BREAKING NEWS EVERY DAY ON OUR WEBSITE.

Coming in September

HERE'S WHAT YOU'LL FIND IN THE SEPTEMBER ISSUE

- The possible functions of Neanderthal DNA in modern humans
- Fragile X syndrome yields its genetic secrets
- New model organisms making a splash
- Time to rethink animal research?

AND MUCH MORE
